

Lead time notice

November 25th, 2021: Increase in Product Lead-Times

As economies around the world begin to recover from the COVID 19 virus, there has been a surge in demand for semiconductor components within several global industries, which has resulted in a further increase in lead time from many of our key suppliers. This leaves us with no option but to extend the delivery lead-times for our products. As of today November 25th, ICT product lead-times for new orders will be increased to at least 40 weeks. Please be sure to place the order(s) as earlier possible. Thanks for the support during these continuing challenging times.
